Dear Sir/Madame,

I am pleased to introduce 2MN LTD a Security Solution Integrator. The company was created by a group of engineers and consultants with over 15 years experience in the IT industry with a blend of skills ranging from: network design and architecture, security solution planning and deployment, along with project management and professional services.

2MN is a strategic partner of RSA Security, EMC, PGP, ArcSight and many security solution vendors. The majority of our consultants have previously worked as support, pre-sales consultants and professional services, all certified to the highest security accreditation. These credentials enable us to gain the trust and confidence from our business and strategic partners and deliver the best solutions to our customers. Our offerings are diverse ranging from architectural design, solution implementation and deployment, custom product integration with third party in-house applications, product training and many more...

Our plan is to create the level of confidence needed by organizations to conduct business with confidence while knowing that their most trusted data are safe and secured, enabling them to gain the trust and respect from their customers and business partners.

Our goal is to be the Trusted Security Partner, using the best, flexible and comprehensive solutions and services through consultancy, professional services and supports to all our clients regardless of their size or geographical location. For more information please visit us at www.2mn.co.uk.

Yours sincerely,

Director
2MN LTD

- MCSE (Microsoft Certified System Engineer)
- CCNA (Cisco Certified Network Associate)
- CISSP (Certified Information Systems Security Professional)
- MCP (Microsoft Certified Professional)
- RSA CSE (RSA Certified System Engineer)

D. PROFESSIONAL KNOWLEDGE & EXPERTISE

2MN consultants have strong knowledge on the various industry solutions such as:

- RSA SECURID (5.x, 6.x and 7.1)
- RSA CERTIFICATE MANAGER (PKI Technology)
- RSA EnVision (SIEM)
- RSA ACCESS MANAGER (ClearTrust)
- RSA DLP (Data Loss Prevention)
- RSA FIM (Federated Identity Management)
- CISCO ACS (Access Control)
- CISCO PIX and Concentrator Appliances
- CHECKPOINT NG
- CHECKPOINT Secure Remote
- CITRIX Xenapp

- CITRIX access gateway
- MICROSOFT IAS/ISA

E. STRATEGIC PARTNERS

Our strategic partners are the key to our success. We value and cherish a privileged relationship with major solution vendors, who are leaders in the industry. This kind of relationship allows us to bargain better deals to our customers while providing the best solution available. Some of our privileged partners are:

- RSA Security
- Cisco System
- CheckPoint
- EMC
- PGP
- FoXT
- Kaspersky
- Convera
- Novell
- Oracle
- Citrix
- Peregro
- CMA Small

III. SOLUTIONS OFFERING

A. Two-factor-Authentication

2MN offers organization a wide range of user authentication solutions to help positively identify users before they are given access to mission-critical data and applications through:

- VPNs & WLANs
- E-mail
- Intranets & extranets
- Microsoft® Windows® desktops
- Web servers
- Other network resources

B. Digital Certificate and Encryption Solutions

The solutions we offer enable Organizations to manage digital certificates and create an environment for authenticated, private and legally binding electronic communications and transactions, while maintaining their authenticity.

- Digital Signatures
- Secure, encrypted e-Mail
- Web Server SSL
- Secure SSL VPN
- Secured SSL login to desktop with files/folders and email encryption
- Secured SSL login to web based applications

- File/Folder, Shared Drives Encryption
- Hard drive encryption
- Mobile, Smartphone security and encryption

C. Security Information Events Management (SIEM)

For a global visibility and monitoring of your entire IT infrastructure, 2MN offers a range of SIEM products for collection, alerting and analysis of log data that enables organizations to meet regulatory compliance and quickly respond to high-risk security events. With its intelligent log correlation, companies can pre-emptively identify any possible threat and take action immediately. Many major global enterprises and government agencies, have selected the RSA enVision 3-in-1 solution to:

- Complete accounting of network activity, comprehensive reporting with built-in and customized reporting capabilities, retention and maintenance of complete log records help ease the burden of compliance.
- Real-time notification of high-risk events, a streamlined incident handling process, and reporting on the most vulnerable assets directly enhance security operations. The SIEM products proposed are not just log collections but provide actionable analysis and remediation intelligence.
- Determine network availability and status, identify network issues and faulty equipment, and gain visibility into specific behavioural aspects of users in order to optimize the performance of your network.

D. Data Leakage Prevention (DLP)

2MN provides solutions that would take into the current IT infrastructure to deploy and integrate a DLP solution that will seamlessly integrate with the client environment while remaining flexible to integrate future expansion.

Our solutions offer a comprehensive data loss approach that enables customers to:

- Leverages common policies across the infrastructure to discover and protect sensitive data in the datacenter, on the network, and on endpoints.
- Mitigates risk through identity aware policy based remediation and enforcement.
- Prevents the movement of data to & from removable media
- Extends Monitoring of data use to desktops/laptops
- Independently audits & logs the transfer of data to and from a variety of removable devices and printers queues.
- Alerts & reports on inappropriate data transfers
- Performs user activity monitoring for independent user access auditing
- Reduces TCO with industry leading scalability, automated protection of sensitive data, and most comprehensive policy library.
- Streamlines the security operations process with incident handling and workflows, and by integrating the RSA DLP Suite with enVision.

IV. CUSTOMERS AND MARKET PRESENCE

2MN operates in a diverse market environment, public and private sector, bank and finance, oil and gas etc...

2MN is present in the European, African and Middle-East market. Our consultants are very mobile and ready to travel no matter the destination with short notice. We have consultants available to assist customers regardless of their geographical location and business sector.

V. METHODOLOGY

Our sales approach is to provide a proof of concept which we know are decision accelerators. Our consultants will confer with the customer to understand their business requirements. They will install the solution in a “sandbox” environment, using real business data and operating under real business conditions.

The success of 2MN is the dedication in providing the best solution with the highest return of investment, while assuring a proper hand over with a step by step knowledge transfer on every project. 2MN consultants work closely with customer technical personnel to study the current IT infrastructure and elaborate a plan to better implement and integrate the solution.

Our goal is to enforce the best security practices that address challenges while taking into account the customer business reality and strategy. We pride ourselves in using the best approach and methodology based on industry regulations and standards.

2MN provides solutions that are scalable, taking into account customer short and long term plan. During the different phases of the project implementation, the customer is constantly informed through daily briefing to ensure and guaranty a steady and synchronised progress. Any additional tasks or changes are discussed and agreed by all parties before making amendment to the overall project.

VI. TRAINING AND SUPPORT

In addition to project deployment, 2MN consultants are dedicated to providing a carefully designed training to empower your organization through direct, focused training programs that enable your organization to get started quickly. 2MN training helps set the stage for long term success and efficiency by taking you from the technological background to the day to day operation, making your organization successful from the first deployment through ongoing end user support.

2MN support team is trained to provide the highest technical assistance via email, phone or instant messages. Our support team is accessible 24/7 and operates from our different offices (UK, Ivory Coast and DRC). Each of our customers has access to the vendor knowledge base, download sites for patch, upgrades and documentations.

All incidents are prioritized and recorded in our incident management system to ensure customer issues are addressed and resolved appropriately. Any unresolved issues are escalated to technology vendors. Customers are kept informed of cases status updates till complete resolution.

2MN also provides premium support with guaranteed SLA (Service Level Agreement). With a premium support agreement, a customer would be assigned a team of consultants with 1 Account Manager to look after their solutions, resolve any issues and minimize downtime by performing periodic site visit.

VII. CUSTOM CODE INTEGRATION

Often integration solutions involve software consultancy and bespoke software development that address complex integration issues; in this area, we also unfailingly deliver quality and supportable custom software that is on schedule and to budget.

Our particular focus is around the major products of our key partner, RSA Security Inc., with the majority of our team of highly skilled consultants also having many years of hands-on experience in designing, implementing and integrating RSA Security's products into enterprise environments.

We provide professional services to resellers, clients and partners putting the focus on the delivery of quality services.

VIII. CONCLUSION

2MN has successfully established itself as a partner to count on. Its close business relation with solution vendors has allowed him to successfully deliver solutions that fit most of its client business need and strategy, hence becoming a trusted partner.

Our goal is to be close to our customers, know their social realities and business need while catering the best efficient technology solution that will empower them and bring them success in their business operations.

We bring to you one of the best and guaranteed consultancy and supports services available in the market with a valuable Return of Investment.
